

LOST

Please Help!

Hi there, on the way home from Greenday tonight on a train likely between seven hills and blacktown we lost a set of ear muffs that I customised especially for my partners birthday concert. We got off a train at seven hills to jump onto one that would take us further west than blacktown at around 1240am and I believe we left them on the seat. If you see these could you pick them up and if you have them we would really appreciate them back, I'm happy to do a set for you as a reward for returnin
