Please Help!

Found Dog: There was a dog just spotted running down along putty hill ave towards harford road. I followed him to someone's front yard. When I tried to approach calmly to attempt to earn it's trust to secure it, it attacked me and bit both of my shins (thankfully i was wearing long pants). I took the best pictures of what I could. The dog was last in the front yard of the house with the pick-up truck in the driveway here on putty hill. I hope someone can help!
