

LOST

Please Help!

Lost Pet: Is this anyone's cat? He's been around 130th Ave and ~88st for a while now, on cold days and during the night sometimes. We just wanna make sure he's being taken care of - otherwise, I've contacted ACCC about bringing him in to be treated and put up for adoption because it seems he has some kind of eye condition and has sustained a scratch somewhere recently. If I don't get an answer here/other pages, the city gave me instructions on how to get him the care he (or she) needs to be safe
