Please Help!

Found Cat: Kwinana Medina 6167 This is all this information I have on this unfortunately. I have been feeding this little beasty for the past few weeks. Quite friendly but keeps its distance. I am having to leave my rental, and have managed to trap it very quickly and is on its way to Baldivis vet for a microchip scan. Does anyone recognise it. Think a female. If no chip will be collected by Kwinana rangers tomorrow morning. Does anyone recognise this beautiful baby.
