Please Help!

Found Cat : Anyone missing their kitty? Very friendly after some food. I'm located in Koondoola 6064 Nankivell way. *EDIT* Vets have confirm that the kitty is not microchipped and is not desexed which has resulted in her getting pregnant. She is apparently due very soon. I am going to discuss with the vet the options of what to do as I wanted to keep the kitty with me until finding the owner or eventually taking her on as my own.
