Please Help!

Found Cat : Update, the cat is microchipped. I have the microchip number and was able to compare it to someones and sadly it wasn't their cat. The vets office would not give me additional information other than the cat's name. I still don't know if its a boy or a girl, as the vet did not do an examination, just a chip scan. === Found, gray cat yellowish eyes, short hair in dayton area bound by riverside/riverview/siebenthaler salem.
