

# LOST

## Please Help!

I have lost my kitten, she escaped from my house. She's a black and white cat with white whiskers and 1 white whisker on the top, white paws and a white line on the middle of her face. She's a very scaredy cat, scared of cars, the road. I'm assuming she has to be in the neighborhood because she wouldn't go off very far, she's either in the neighborhood, in someone's house in the neighborhood or my local warden took her. She's not neutered so it's most likely she could be hanging out with cats.
