

LOST

Please Help!

"Sabre" is a medium brown cuddly smilodon or Sabre toothed cat, originally from the Natural History Museum. He has round dark ears and what once was white chin with white sabre teeth or fangs. His fur is matted and dirty from 2 years of daily play. Lost on Monmouth beach, probably beyond the first sections of ammonite pavement as we walked a long way. He's probably lost to the sea, but we want him back in any condition, including smelly with seaweed!
