

# LOST

## Please Help!

I lost a black medium sized rucksack with a front, middle and main zip. The handle has a transparent PVC tubing as part of the detail and on one of the straps it has what looks like an Italian flag from a distance. With it I was carrying a material/felt type totes shopping bag that had clothes and possibly my iphone with power bank. my medication took more affect than usual and I don't recall several hours from that moment and came around by Acton Station with a bleeding and bruised knee.
