Please Help!

Hi everyone, I found a Canon EOS 77D at the bottom of a hill in Caernarfon, Wales on the 11th of August. It had an 18-300mm F3.5-6.3 DC MACRO Sigma lens attached. I've attached a photo taken on the camera, hoping they might help identify the owner. Please share if you recognize any of the images or know someone who has lost their camera. Thanks!
